GP Website Health Check

Great Sutton Medical Centre, Ellesmere Port

This short report looks at the user experience of GP websites and gives insight to both GP Practices and the public into how easy they are to use to find information, book appointments, and manage medication. This report focuses on Great Sutton Medical Centre in Ellesmere Port. Their website can be accessed at:

www.greatsuttonmedicalcentre.nhs.uk.

The desk research upon which this report is based was completed on 15 September 2021.

What is Healthwatch?

Healthwatch Cheshire is the local independent consumer champion for health and care services, forming part of the national network of local Healthwatch across England. As part of our core activity we seek the views and experiences of residents of Cheshire East, and Cheshire West and Chester to help inform how health, care and wellbeing services are planned and delivered. The information we gather is then analysed so that we can identify and act upon trends and common themes by presenting our findings to decision makers in order to improve the services people use. We also share people's local views with Healthwatch England who strive to ensure that the government put people at the heart of care nationally.

More about our work can be found at www.healthwatchcwac.org.uk and www.healthwatchcheshireeast.org.uk.

Background

The COVID-19 pandemic has created unprecedented challenges for everyone working in the health and social care system. GP Practices have, like others, had to respond to new demands which have caused changes in the way they operate. During this time, feedback received from people across Cheshire illustrates the challenges they have when contacting their GP Practice for advice, information or to make appointments. There is a heightened reliance on digital platforms for the sharing of information between service providers and the public. Websites are for many people their first point of access to information, and it is therefore vital that GP websites are providing accurate and up to date information for their patients. In the context of significant pressures and demands, it is hoped that this piece of work provides useful insight to assist GP Practices.

We carried out a 'health check' of GP websites in Cheshire to assess how easy the websites are to use, how easy it is to book an appointment and order repeat medication, and what signposting information and advice is available. In addition, we wanted to find examples of best practice to be able to share more widely across the primary care sector.

Similar projects have already been carried out by other Healthwatch organisations nationally including North Yorkshire and the East of England.

Methodology

Over a number of weeks between September and December 2021, a team of 16 Healthwatch Cheshire volunteers undertook a 'health check' of all websites of GP Practices in the 17 Care Communities across Cheshire East and Cheshire West and Chester – a total of 85 GP Practices. The volunteers acted as 'mystery shoppers', in the role of members of the public. To avoid preconceptions, volunteers did not evaluate their own GP's website.

The health checks involved asking 24 questions and providing answers to these questions to reflect positives and areas for improvement on websites.

Volunteers were asked to answer the questions as if they themselves were a patient who wanted to find the information on each website. It was recognised that one volunteer might answer differently to another: this represents the variation that members of the public might demonstrate when visiting their own GP website.

Similarly, if a volunteer was unable to find information on a Practice website – this represents a member of the public not being able to find the information they need. Such instances highlight a need for website improvement in terms of accessibility or clarity of navigation.

We adapted questions developed by Healthwatch colleagues in the East of England to reflect current national circumstances and issues raised by our ongoing work in Cheshire. We asked the following questions:

- What is the name of the GP Practice?
- Where is the GP Practice located?
- Which care community is the GP Practice located in?[1]
- Does the website have a search bar?
- Is the website accessible (simple and easy to use, with clear fonts and language)?
- Is there the facility to change to a language other than English or support for the partially sighted?
- Does the website have links to self-care and support organisations for health and wellbeing?
- Was it easy to find the information you needed? This will include at least: 1) Link to NHS 111 First. 2) Social Prescribers linked to GP Practice. 3) Local Authority Live Well website.
- Is it easy to access information on services and make an appointment?
- Does the GP Practice detail out of hours advice for use of NHS services?
- Is there a link for patient log-in and for downloading the NHS app?
- Is there a link to the NHS COVID-19 advice site?
- Does the website contain COVID updates and news?
- Is there information about or links to the local Healthwatch?
- Are the GP Practice's values and aims clearly outlined?
- Is the GP Practice's latest CQC rating and report detailed and linked?
- Does the website contain key contact information for staff, (incl. staff profiles)?
- Does the website have a patient feedback facility?
- Is it easy to find out how to make a complaint?

[1] Care Communities aim to bring together people living, working or involved in an area to improve the health and wellbeing of local residents.

- Does the website contain current Patient Participation Group (PPG) information?
- Are there social media links (e.g. for patients/users to share useful information from the GP website on their social media platforms)?
- Does the website detail Practice opening times, location map and address?
- Are there options of in-person, phone, or video appointments?
- Your overall opinion of the website, how logical is it, is it easy to navigate, is it user-friendly?

Our volunteers found many great examples of GP websites providing crucial information and support for members of the public in Cheshire, but also examples of areas in need of improvement. Reports will be published on our websites, and shared with GP Practices and our wider range of health and care partners.

The following pages provide our 'health check' on the website of Great Sutton Medical Centre.

Website Health Check

What is the name of the GP Practice?

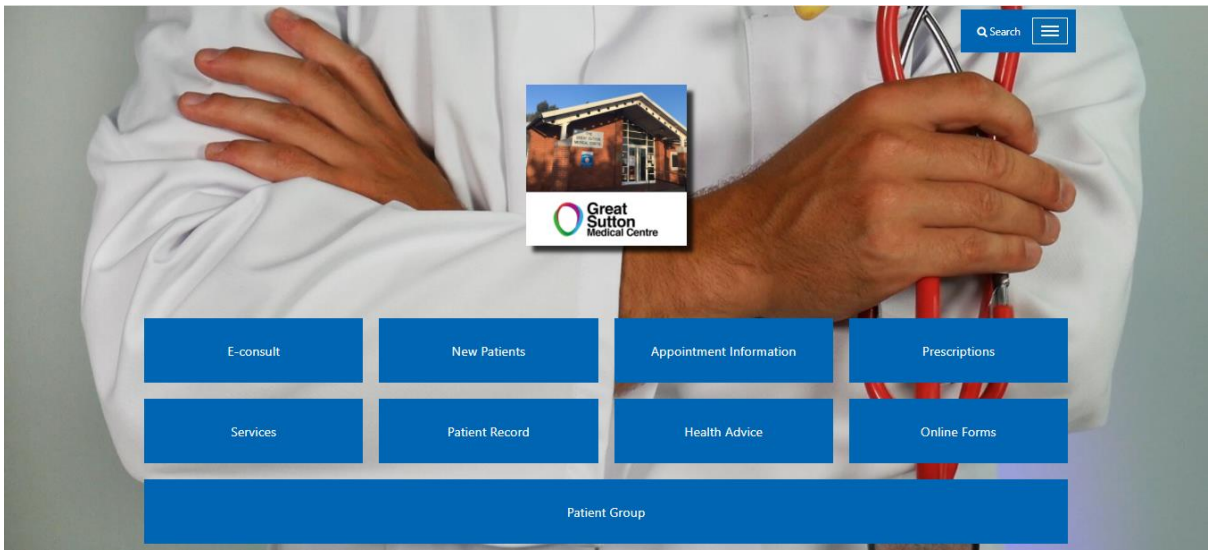
Great Sutton Medical Centre

Where is the GP Practice located?

Cheshire West

Which care community is the GP Practice located in?

Ellesmere Port



Does the website have a search bar?

Yes, it is very clearly found.

Is the website accessible (simple and easy to use, with clear fonts and language)?

Yes, there is clear tabs to use and the search bar if anything else needs to be found. It is a visually appealing website with clear and well-sized font choice in addition to differentiating colours to separate sections on a page and important things in red to draw attention to this.

Is there the facility to change to a language other than English or support for the partially sighted?

Yes and No. We could not find a translate section on the website to change the language, it would be useful for this to be clearly on the main page. We were unsure how to change the font colours and contrasts on the website. The initial font size is a great size and when you zoom in the information fits nicely on the page.

Does the website have links to self-care and support organisations for health and wellbeing?

Yes, you can click through what you need easily. The information on pharmacy first is very clear and comprehensive, and we were impressed with this level of detail. It provides relevant services that can help such as Carers UK, some more services could be added to these types of sections such as Cheshire West Carers Support service.

Was it easy to find the information you needed? This will include at least: 1) Link to NHS 111 First. 2) Social Prescribers linked to GP Practice. 3) Local Authority Live Well website.

Yes, NHS 111 was available and mentioned throughout. We were unable to locate information on social prescribers. We could not find any mention of the Live Well website.

Is it easy to access information on services and make an appointment?

Yes, it is very clearly found, extensive and clear information provided.

Does the GP Practice detail out of hours advice for use of NHS services?

Yes, it provides a variety of options including walk-in centres.

Is there a link for patient log-in and for downloading the NHS app?

We could find the link for e-consult but could not find reference to patient access or the NHS app.

Is there a link to the NHS COVID-19 advice site?

Yes, there is also a video available.

Does the website contain COVID updates and news?

Yes, this is the first thing that appears when you open the website and it makes things very clear. We also like that there is extensive information for patients seeking dental care with this being a problem occurring currently.

Is there information about or links to the local Healthwatch?

We could not find evidence of this.

Are the GP Practice's values and aims clearly outlined?

Yes.

Is the GP Practice's latest CQC rating and report detailed and linked?

Yes, this information can be found at the bottom of the home page. There is a rating from 2017 and there are two links but they state not registered.

Does the website contain key contact information for staff, (incl. staff profiles)?

Yes, it lists staff members and provides GPs' qualifications. A picture and profile would be a nice addition to the website.

Does the website have a patient feedback facility?

Yes.

Is it easy to find out how to make a complaint?

Yes, feedback and complaints are found under the same link. Wwe needed to search for this link to be able to find this.

Does the website contain current Patient Participation Group (PPG) information?

Yes, aims are clearly outlined and a clear form to fill in to join. It is not clear whether this information is current and the last reports related to the PPG are from 2014 -2015.

Are there social media links (e.g. for patients/users to share useful information from the GP website on their social media platforms)?

We could not find evidence of this.

Does the website detail Practice opening times, location map and address?

Yes, opening times and an address with a location map powered by google.

Are there options of in-person, phone, or video appointments?

Yes, it mentions in-person and phone appointments. We could not find anything about video appointments.

Your overall opinion of the website, how logical is it, is it easy to navigate, is it user-friendly?

Overall this website is very user-friendly, visually appealing and uses clear and comprehensive language. The use of images and content makes the information quick to locate. There are only a few things listed in previous questions that would help to provide a complete website.

Feedback from GP Practice

No feedback was received at the time of publication.

Next Steps

The COVID-19 pandemic and its consequences have seen enormous pressure placed on GP Practices across the UK. They have been required to significantly adapt ways of working within very short time scales. Times like these present challenges but also opportunities. GP Practices have had to work much harder with often reduced workforces, delivering online and phone consultations in place of face-to-face appointments.

It is in this context that we have undertaken this work, to highlight a simple, yet very important, area for improving patient experiences. Our volunteers found many great examples of GP websites providing crucial information and support for members of the public in Cheshire, but also examples of areas in need of improvement. Later this year, we will revisit this work to report on any changes that have been made as a result of our findings.

Healthwatch Cheshire will disseminate our reports to all GP Practices involved in this study, NHS Cheshire CCG, and partners throughout the Cheshire Care Communities. We will continue to gather feedback from the public regarding their experiences of GP Practices more widely, and use this to identify areas of good practice and of concern.
